## PATIENT DETAILS

Name: John Doe

Age: 45

Contact No: +91 8765432109

## MEDICAL ANALYSIS & EFFECTS

### Meningioma (20%):

Mild meningioma detected, may cause headaches and vision issues. Regular monitoring advised.

### No Tumor (60%):

No abnormal tumor growth in major regions.

### Pituitary (10%):

Slight enlargement, could affect hormonal balance. Endocrinology consultation recommended.

### Glioma (10%)

Small glioma presence, may lead to neurological symptoms. Further imaging and biopsy recommended.

## DOCTOR'S RECOMMENDATIONS

- Immediate neurology consultation advised for glioma.
- Hormonal tests recommended due to pituitary gland changes.
- Follow-up MRI in 6 months for meningioma monitoring.
